

Saint Germain, Master of Aquarius

- Elizabeth Clare Prophet

(Inner Perspectives: A Guidebook for the Spiritual Journey)

Excerpts:

“...I think that America knows it needs its leader. And at no time in its history has it needed its leader more. We see the dearth of leadership in government and in society today and we all say, ‘Where are our leaders?’

There was a time in the period of the development of Israel when there were no kings but only judges in the land because none were worthy to be king. The word *king* is a code word, or an abbreviation, for ‘the one who holds the key to the incarnation of the God flame’ – *k-in-g*.

The one who holds the key for our incarnation of the God flame in America today is the Ascended Master Saint Germain. This does not make Jesus Christ of any less importance in America. It means that what we have learned from Jesus Christ as our great teacher of the Piscean age and as the World Saviour has prepared us to meet our next teacher, our next master. Beloved Jesus the Christ has prepared the way for us to follow Saint Germain.

Saint Germain, who was embodied as Saint Joseph, protected Jesus as he was preparing for his mission. America is in her childhood today and Joseph, the protector of the infant child (the Divine Manchild who is brought forth by the Woman clothed with the Sun) is Saint Germain.

Saint Germain has a special message for this seventh age and this seventh dispensation. And this is why he is referred to in the Book of Revelation as the seventh angel. **The seventh ray is the ray of alchemy, of science, of freedom, of transmutation and transformation...**

...This two-thousand-year cycle, then, is a period of learning, a period of transition, a period when we must secure our freedom: freedom in America and freedom for oppressed peoples everywhere. If we do not pass this initiation as individuals, gaining our freedom from personal tyranny, and if we do not pass this initiation as a community and as a nation, we will not be able to continue in the path of initiation over the next two thousand years. Instead, we will find ourselves at the mercy of some sort of superstate or supereconomy, where the nations of the world are utterly controlled by the elite through their control of the money and the money system. We see this happening today both through government and through the multinational corporations.

So, even when the little people of the world lift up their heads in outrage, nothing can be done because power (and money is power) is vested in the hands of the few. And the few are representing their own vested interests rather than the real interests of the children of God on earth...

...Saint Germain comes, as Jesus did, to overturn the moneychangers in the temple. He comes in this age for the redress of grievances being practiced against the people, even as Jesus came in his time to correct the darkness of the Sadducees and Pharisees, even as Gautama Buddha came in his time to challenge what was happening in a decadent Hinduism.

The thing we have to realize is that the way religious thought goes is the way government and the economy will go. This is because religion, even if it is rejected, forms the basis of the culture and of the self-awareness of a people. **If people do not have the correct understanding of their rightful and lawful relationship with God through Christ, through the Great White Brotherhood, they are not free to act with the full power and authority of God behind them.** They fear to act for fear of the consequences, and therefore they do nothing.

And the fallen ones, who have wrested the secrets of the universe, manipulate God's energy and manipulate the masses through the media. They move in and take more and more and more, even while they lead the people down the primrose path of a pleasure cult and a self-indulgence whereby they neglect the important details necessary to their survival, both spiritual and material.

Saint Germain is concerned about our material survival in America and in every nation, because the material foundation of life is the basis for all spiritual preoccupations. We cannot completely lose ourselves in the spiritual, in meditation, in the enjoyment of God, but we must bring back—as Gautama Buddha did from the planes of nirvana, the planes of bliss and enlightenment—that which we have gleaned. And we must take practical measures right down here on the city council, right here on the school board, right here with the problems of integration. **This is where life is happening. This is where policies are being made that affect the future of our children and our nation.**

We don't know how to analyze because we have not been given the standard of the Christ consciousness. Saint Germain comes to bring us that standard.”
