

The Divine Director Invites Us to Be Renaissance Men and Women of This Era

David Christopher Lewis Discourse – (overshined by the Beloved Divine Director)

– (August 18, 2021 / The Hearts Center)

Excerpt:

“The Divine Director is the epitome of the renaissance man and woman, and he invites us to also consider being a renaissance man or woman now, rather than in the future. What does this mean? It means that we have mastery of the seven rays and we work on a number of levels of awareness to help the planet, to help the citizenry of the Earth, to help all mankind in its spiritual evolution. We assist in the enlightenment, Self-realization, illumination and ultimate ascension of every man, woman and child by being a renaissance man or woman. We help to rekindle the fire burning within the hearts, upon the altar of the heart, of everyone. And we dedicate and consecrate ourselves to the holy purposes of God, God's holy will, wisdom and love manifest in perfect balance—body, mind and soul, heart, head and hand.

As we consecrate our lives to God's holy purposes and we claim to be those renaissance men and women of this era, God will endow us with certain gifts of the Holy Spirit, the *siddhis*, known of in the East. These are sacred quintessences that originate from the mind, the heart and the will of God to be offered to those initiates of the sacred fire who, through their consecration and dedication, desire to be of great service, planetary service to others.

As renaissance men and women, we are involved in a number of activities, initiatives. We are so focused on the divine plan of the Earth itself that we see ourselves as assisting the Divine Director in fulfilling the divine plan of the Earth. Consider that. It's both your own divine plan; the divine plan of this movement, the Hearts Center; of all ascended-master movements and communities of light; and of the greater planetary evolution and planetary Self-realization, planetary ascension.

As renaissance men and women, we use our creative abilities and talents, those that God has vouchsafed unto us long ago and those which we have developed over many lifetimes to engender this new-age, or new-era, consciousness. The new-era consciousness involves sacred brother/sisterhood, divine love, holy friendships between all peoples. It involves *theosophia*, which is divine wisdom manifesting through our hearts and minds through the heart-mind connection. It involves co-creativity with God, because we see ourselves as fully Self-realized sons and daughters involved in heaven's affairs, drawing heaven into earth; manifesting, through those gifts of the Spirit, aspects of the heaven world in the etheric planes, which already exist and which we are consciously seeking to precipitate upon earth through our work, through our service, through all that we do, think, feel, say and accomplish, by God's grace.

We are renaissance men and women by God's grace and only by God's grace. Of ourselves, we can do nothing.¹ Yet through God's will and God's strength, which strengthens us, we can

accomplish anything that we set our hearts and minds to, in accord with God's holy will. And that is the key. It must be in accord with, it must be in alignment with, it must literally be in the same frequencies and vibratory schemes and patterns as God's will itself.

I remember that Mark Prophet said, 'Lo, I am come to do thy will, O God,' when he descended into incarnation. And I believe Jesus may have said the same thing as his spirit descended into the physical temple of the little baby in Bethlehem. Have we said this? Hopefully. If we don't have the memory of saying it as we incarnated, we can say it today. Let us say it three times. [David and audience say together three times: 'Lo, I am come to do thy will, O God!']

Saying these words sets in motion the sacred dynamic in which, through that alignment with God's will, we are guided, we are guarded, we are protected, we are sealed in the blue-light radiance of the Divine Director's planetary matrix of Solar light, a planetary matrix of Solar light. This Solar light is growing and expanding as our solar system nears and passes through the regions within the galaxy that are near the Central Sun of this galaxy.

All life, both on our world and throughout our solar system and even within the entire galaxy, is being accelerated by the higher vibrations and frequencies of the Great Central Sun, which is stepping down those energies unto us so that we can raise and elevate our consciousness to a higher frequency of ascended-master God-consciousness.

As we absorb these frequencies and then utilize them in our conscious daily spiritual work, attending to all the things that we are inspired to do; listening deeply within through meditation, contemplation and reverence for life; entering the stillness and asking heaven what heaven would have us do each day; and then going forth and doing it with great joy, harmony, love and understanding, we bring those higher dimensional planes and levels of awareness right into our domain through our work and service. We consciously embed and etch within the Earth these holy engrams of light. It is our joy to do this. We feel lifted up and raised up when we are creative, when we are renaissance men and women and are infilled with the Holy Spirit's grace and blessings through the work that is accomplished through us, by God's grace."
